PROJECTS

TaskNest (Task Manager Web App) - React.js, JavaScript, Bootstrap
- Built a responsive task management application with task creation and deletion operations, time and date scheduling, and local storage persistence, featuring a modern UI and grid-based layout.

Textify (Text Utility Website) - React.js, JavaScript, Bootstrap
- Developed a text-processing tool with uppercase/lowercase conversion, find & replace, clear text functions, and seamless navigation using React Router DOM.

Library Management System – Java(OOPS)
- Designed a console-based system to manage books and members, implementing OOP principles for modularity and efficient record handling.

Bank System Application – Java(OOPS)
- Created a Java application simulating core banking operations (account creation, deposit, withdrawal, inquiry) with scalable, object oriented design.
